CONTENTS

- Tailgate handle camera with power cable
- 8m extension cable

Power cable with green/white loops

8m extension cable

INSTALLATION

NB: The two loops on the camera power cable will activate/deactivate the following features:

	Cut Loop	Loop Intact
Green	Disable parking guidelines	Enable parking guidelines
White	Mirror image	Normal image

1. Firstly, remove the inner panel from the tailgate and remove the handle fixing screws. Then remove the tailgate handle from the vehicle.
2. Remove the locking mechanism from the factory tailgate handle and refit it into the replacement handle containing the camera.
3. Attach the camera to the vehicle using the original screws and route the camera cable through the tailgate and under body to the location of your monitor.
4. Connect the black wire to a suitable ground and the red wire to the reversing light circuit or an interface which provides a reverse signal.
5. Connect the camera cable to the connection cable and connect the video cable to the display monitor and ensure that the image is displayed correctly.
