#### **FITTING GUIDE**

- 1. Remove and disconnect the original head unit.
- 2. Connect the 12 way molex connector of the head unit patch lead (supplied separately) to the interface.
- 3. Connect the opposite end of head unit patch lead to the head unit steering wheel control input on the back of the aftermarket head unit.

NB: This may be a 3.5mm jack plug or a wire input depending upon the head unit brand being fitted. Please see the head unit installation manual for further information on where to connect.

Important: This step must be completed before connecting power to the interface. Failure to so do may result in no steering wheel control function.

4. Connect the 14 way molex connector to the interface

5. Connect the male power/speaker ISO harness to the female power/speaker ISO harness from the aftermarket head unit. For aftermarket head units without an ISO connector, please refer to "Wiring Colour Codes" on Pg. 2.

#### **FITTING GUIDE**

6. Connect the female vehicle specific connectors on the harness to the male vehicle connector from the vehicle. Test head unit for correct operation.

#### STEERING WHEEL CONTROL FUNCTIONALITY

Original Button	Function
+ Icon	Volume +
- Icon	Volume -
Up Arrow	Track +
Down Arrow	Track -
MUTE	Mute
Green Phone Button	Pick Up
Red Phone Button	Hang Up
MODE	Source

### To Adjust Fader:

- 1. Press and hold Source for 10 seconds. Audio will mute when the fader menu has been entered. NB: Once in the menu, steering wheel control functions will enter menu functionality.
- 2. To adjust the fader, use the Track +/- buttons
- 3. To exit the fader menu, press the Source button. Audio will mute twice when the fader menu has been exited and the steering wheel controls will return to normal functionality.
